

## In a growing global economy

finding the right resources for large scale IT implementations is becoming increasingly complex and time-consuming

Wouldn't it be great to have available **on demand** the best technical consultants and project managers as key members of your team?

**GRIDMS** (Grid Mining Services, Inc.) is an emerging business and technology firm which has built a reputation on outsourcing expertise and talent for a specialized technology market. A small firm, working on a global scale, we have provided some of the best technical resources to a number of the most important implementations in the world.

Our clients include: Atlanta Gas Light, Chattanooga Natural Gas, Sequent Energy Management, AGL Networks, Emory University, and Sanmina-Sci among others.

GRIDMS is a specialized global supplier of

## highly skilled workforces

- o Business intelligence analysts
- o Advanced technical consultants
- o Professional IT developers
- o Integration infrastructure and middleware specialists

We provide enterprise software certified experts, such as SAP R/3, mySAP Business Suite, SAP NetWeaver, Oracle Applications, Oracle Fusion Middleware, J2EE and Microsoft .Net technical consultants and developers, with excellent communication skills and a deep understanding of our client's business needs. ***The right profile for modern implementation teams.***

## Our business model

 is quite simple and centered

around three main principles:

- o Outstanding customer service
- o Sound business and technical expertise
- o Dependable quality

Stated simply, having access to the best people, the best technology and the best business practices creates an immediate formula for success. That's why our core philosophy can be said in a single line:

## Ordinary professionals doing extraordinary things ©

Our group of

## IT developers and technical consultants

can help remove the burden of managing complex back-office technical functions by mitigating scalability and performance issues, supporting your IT department initiatives to modernize, organize and simplify its infrastructure; therefore producing immediate measurable results.

Our unique training methodology ensures that you receive high quality professionals, proven business technology, and talent delivered directly to your door; **no freelancers, no body shop**, but true business partners with the right skills and motivation to understand your unique business culture.
